TRITECH[®]

AIR MATTRESSES

Tritech[®] beds are both exceptionally comfortable and dependable. With a polyester mesh core encased in two layers of laminated PVC, this material provides superior strength and durability. Air mattresses with the Tritech internal support system keep their shape no matter how many times they're inflated or deflated. Plus, air mattresses are stress-tested against the typical weight, strain and movement of a good night's sleep to guarantee longevity.

A man with short dark hair and a light beard is sleeping peacefully on his side. He is wearing a light blue t-shirt and dark shorts. He is resting his head on a large, dark blue, U-shaped inflatable pillow. His hands are resting on the pillow near his head. The background is a light blue wall. The overall scene is a close-up of the man and the pillow, with a white text box overlaid on the right side.
