CoolerZ™

NO ONE IS **COOLER!**

A unique line of more "grown up" water sports items, CoolerZ™ means relaxing fun in the sun with friends and family, either by the pool or at the beach. CoolerZ's thicker material gauge and added value elements and accessories all add up to a premium inflatable product experience. With built-in cup holders and cooler bags, just to name a few of the cool features, you'll want to be in on the fun the CoolerZ line guarantees!

INFLATA-SHIELD™

Bestway is looking out for your fun with ALL CoolerZ products:

- Thicker material provides an extra-strong barrier to better resist puncture.
- Increased tensile strength limits stretching and allows for greater rigidity.
- Embossed texture enhances grip.

STAND UP PADDLE BOARDS

WFS
HYDRO-FORCE™

STAND, PADDLE, BREATHE

Stand up paddle boarding was recently reported as the outdoor sporting activity with the most first-time participants of any in the United States. And it's no wonder why. It is relatively easy for anyone to do, and the health benefits gained from paddle boarding are tremendous! With some awesome boards to choose from at Bestway®, this summer is the perfect time to give it a whirl! And because our boards are inflatable, you can take them with you wherever you go. Bestway rules the lineup when it comes to inflatable SUPs!

STANDING UP ON YOUR SUP

When you're new to the sport, it's best to start out in flat, calm water that's free of obstacles like boats and buoys. At first, you may find it easier to kneel on the board rather than to stand upright. Here are the steps to get you started:

- Standing alongside the board in shallow water, place your paddle across the deck of the board and use it as an outrigger. The paddle grip is on the rail (edge) of the board; the blade rests on the water.
- Hold the board by the rails. One hand will also be holding the paddle grip.
- Climb onto the board in a kneeling position, just behind the center point of the board.
- From that kneeling position, get a feel for the balance point of the board. The nose shouldn't pop up out of the water and the tail shouldn't dig in.
- Keep your hands on either side of the board to stabilize it.
- Once you're ready, stand up on the board one foot at a time. Place your feet where your knees were. You might also bring a friend to help stabilize the board as you get the hang of standing on it.

Bestway's inflatable SUP line offers all of the advantages of fun that comes along with hard boards plus these added benefits:

SUP Stance

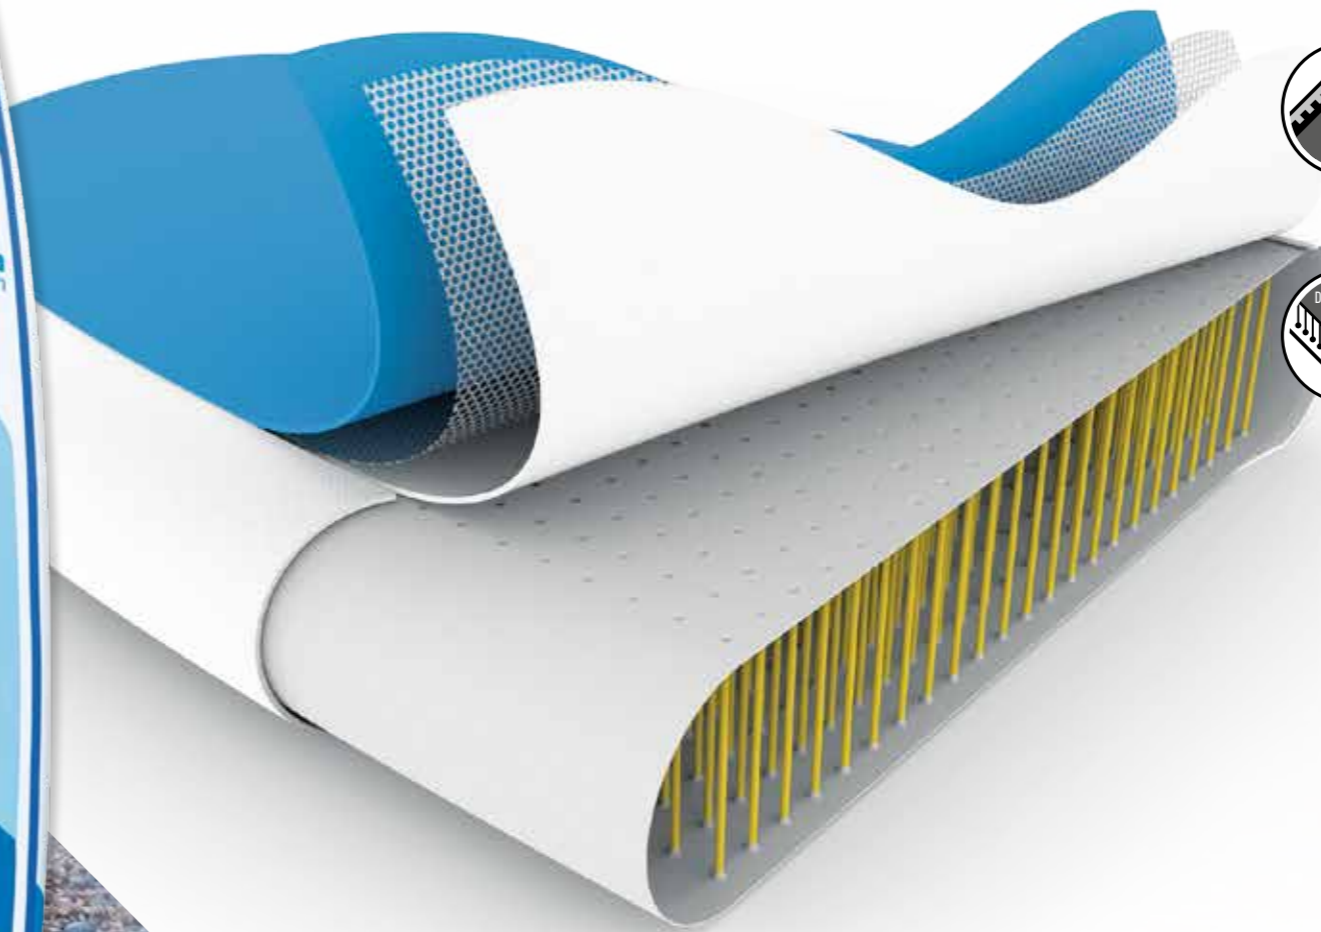

- To maintain your balance as you stand upright on the board:
- Your feet should be parallel, about hip-width distance apart, centered between the board rails (edges). Don't stand on the rails.
- Keep toes pointed forward, knees bent and your back straight.
- Balance with your hips—not your upper body.
- Keep your head and shoulders steady and upright, and shift your weight by moving your hips.
- Your gaze should be level at the horizon. Avoid staring at your feet.
- Much like bicycling, when your forward momentum increases, your stability increases as well.

SUP Stroke

Once you're comfortable balancing on the board in flat water, it's time to take off on a longer excursion—where the real fun begins.

WIS[™]
HYDRO-FORCE[™]

Inflatable SUPs built the best way!

TRITECH™ MATERIAL

TriTech™, a 3-ply reinforced material with a polyester mesh-core encased in two layers of laminated PVC that offers superior strength and durability. This premium marine grade material can withstand the most extreme nautical conditions including exposure to petroleum products and ultraviolet rays.

DROP STITCH™ MATERIAL

It's a wonder material that has been successfully used in such mission-critical applications as floating docks, high-pressure rescue lifting bags and even airplane wings! It owes its remarkable properties of extreme rigidity combined with astonishing lightness to a network of thousands of polyester threads (the "drop stitches" referred to in the name). These threads securely connect the material surfaces internally, while carefully applied sidewalls seal the finished inflated cavity to create a panel that effectively supports considerable weight while itself being light and easily portable when deflated.

Bestway's® inflatable SUP line offers all of the advantages of fun that comes along with hard boards plus these added benefits:

- **Easily transported** on a plane or in a car, this is a money saver and a convenience, as there is no need to purchase a roof rack or pay expensive shipping costs.
- **Sold as a package deal**, everything you need is included in one lightweight, grab-and-go carrier. A set is also available with a conversion-to-kayak kit.
- **Generally thicker and more stable** than hard boards, which is an advantage for beginners just starting to learn.
- **Allows more versatility**, as they can be inflated and deflated easily.
- **Resilient**-while a hard board may become damaged from running into a dock, an inflatable board tends to bounce right off with no damage.

HYDRO-FORCETM

INTRODUCING A NEW LOOK!

The NEW Hydro-ForceTM look is all about stand up paddle boards and the lifestyle that comes with them. We've upgraded not just the packaging but also the boards themselves and have pushed for a more sportier and serious line that can appeal to a whole range of users.
